

# GASOLINE APPROVAL SYSTEM

Is your dealership pumping profit down the drain? Gasoline expenses account for thousands of dollars each month. How do you know you're really buying just gasoline? Gasoline Approval System (GAS) is a web-based purchase order system specifically designed to track, manage, and control your monthly gasoline expenses.

“ I really had no idea what our actual expense was per month. I never imagined the kind of fraud and waste that existed in my store. The 15 seconds that it takes per gas ticket reduces my expense by more than 30%.

Alen Baik, General Manager, Lexus of Silver Spring

## Track

On every PO, GAS records the stock or RO number along with the employee who approved and requested the purchase. You'll save hours reconciling expenses at month end.

## Manage

Open, close, void, and reconcile your gasoline POs all in one place. The easy-to-use web tool allows you to manage each step of the process.

## Control

Pull reports showing all open POs and the PO history for a particular stock or RO number. Receive email alerts if a transaction looks fraudulent.
